Descripción del producto

Every competitive chess player needs a sound grasp of how to play this opening -- and especially how to meet the most popular lines. The Nimzo-Indian is Black's most respected answer to 1.d4 and is immensely popular at all levels, from club championship to world championship. In fact, the reputation of the Nimzo is so high that some players prefer simply to avoid it. American International master David Vigorito shows that this negative approach is unnecessary. Challenging the Nimzo-Indian provides White with a complete repertoire based on 4.Qc2. The chess is certainly at a high level, but Vigorito's logical approach and clear conclusions means that

- readers can easily grasp the concepts
- less-experienced players can play through the high-quality example games that are comprehensively explained

ISBN: 978-91-976005-5-2 - 320 pages - Publishing 20 March 2007
